ALL THE CHARACTER AND CHARM OF A GEORGIAN SASH WINDOW

Our partners Legacy™ sash windows have been designed to keep the character of 19th Century sash windows and replicate many details from the original designs. From the subtle Ovolo beading around the glass to the bolder decorative sash horns and classic complementing furniture the Legacy™ range stays as close to authentic as possible but uses modern materials, innovation and engineering to deliver an outstanding performance.

- 1 Frame to frame lever lock
- 2 Sash horns
- 3 Finger lifts & finger pulls
- 4 Ovolo beading

THE NEXT GENERATION ECO DIAMOND™ WINDOW

Our partners EcoDiamond™ window range uses cutting edge technology so that you get windows that not only look great but are rigorously tested to exceed the standards for security, heat retention, and weather performance. Our windows are strong, robust, and built to last with an impressive list of security features for your peace of mind.

What is multi point locking?

Our partners have a range of colours, styles, and options to suit almost every property. What's more, every window comes fitted with multi point locking systems as standard. This is a combination of parts designed to secure the opening window to the frame to make your home as secure as possible. They also have a five point locking system specifically engineered to make it difficult for anyone to get into, so you can sleep easy knowing your home is safe and secure.

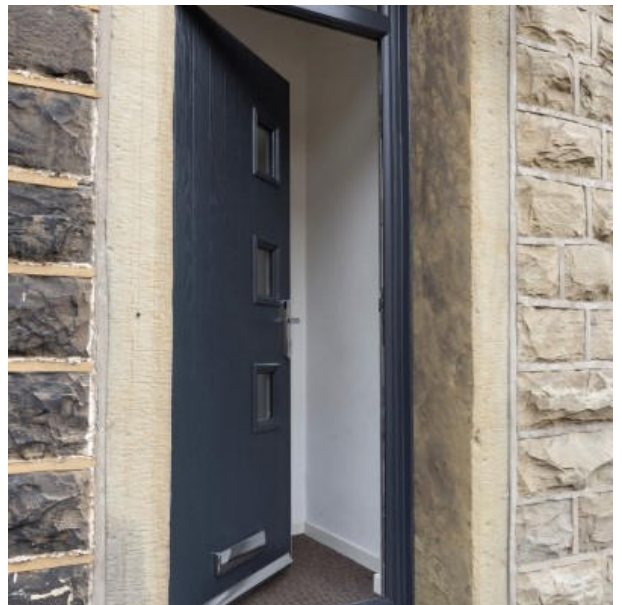

Keep your home warm and feel the benefits of reduced energy bills.

With a design focussed on keeping you warm and eliminating draughts the A-rated EcoDiamond windows are independently tested by the British Fenestration Rating Council.
